

07-Aug-2023**To Whom It May Concern**

Re: Rengasamy Sivaramanathan

This is to certify that Rengasamy Sivaramanathan is currently employed by Oracle CAPAC Services Unlimited Company (Singapore Branch) as Principal Cloud Architect - Data Management. Rengasamy joined the company on 06-Jan-2020.

Rengasamy's current work location is 1 Fusionopolis Place, #12, Galaxis, Singapore 138522.

Rengasamy Sivaramanathan's main responsibilities are as below:

Engages with strategic customers, builds leadership relationships at multiple levels within organizations in order to design and implement solutions. Works directly with customers to gather requirements, develop architectures and translates business needs into solutions. May implement solutions and ensure successful deployments through code development and scripting. Displays product/application understanding through highly customized presentation demonstrations to customers, and at conferences, and events. Supports customer from Proof of Concept (POC) through production deployment of services via resource configuration, planning, and customer education/training. Creates and distributes technical assets (white papers, solution code, blog posts, and video demonstrations). Serves as a leading contributor for customers and sales on technical cloud solutions and customer success. Identifies gaps and enhancements to influence engineering roadmaps for customer driven features. Leading contributor, may provide direction and mentoring to others. Work is non-routine and very complex, involving the application of advanced technical/business skills in area of specialization. May interact with C level. Maintains expertise by staying current on emerging technologies.

Sincerely

Agnes Tan
Senior Human Resources Director
